

## BUREAU OF INDIAN STANDARDS

### Program of Work

#### ETD 54 : Marine Energy Conversion Systems

**Scope:** To prepare standards for marine energy conversion systems. The primary focus will be on the conversion of wave, tidal and other water current energy into electrical energy, although other conversion methods, systems and products are included. a) terminology; b) management plans for technology and project development; c) performance measurements of marine energy converters; d) resource assessments; e) design and safety including reliability and survivability; f) deployment, commissioning, operation, maintenance, retrieval and decommissioning; g) electrical interface, including array integration and / or grid integration; h) testing laboratory, manufacturing and factory acceptance; i) additional measurement methodologies and processes.

**Liaison:** **IEC TC-114 (P):** *Marine energy - Wave, tidal and other water current converters*
