

Anti Bribery Management System

Bribery is one of significant risks faced by organizations of all sizes, sectors and Business nature. The act often results in the loss of customers' confidence, loss of business and negative backlash from within the organization.

Central Warehousing Corporation, a pioneer in public warehousing and a part of Government of India's public distribution of food grains. Certainly, bribery and corruption in one form or the other, will affected the operations and image of of our organization. The Vigilance Division in CWC under the guidance of CVC and with the able administration of CVOs has always emphasised on training new employees and dissemination enough information to all the concerned parties to bring transparency in the operations of CWC

Vigilance Division at CWC had taken up several preventive measures like detecting irregularities, analyzing and finding out reasons for such irregularities and making effective systemic improvements to curb them. And as a part of punitive measures, it also identified the officials responsible for misconduct and taken appropriate Disciplinary action.

CWC, under the guidance of our TOP management had taken up several IT initiatives like Warehouse Management System, Bill tracking system, Grievance redressed portal which improved the to improve the efficiency and transparency .

Now as a part of Participative vigilance, it is necessary to increase the awareness among the employees, Business partners and customers regarding the impact of corruption and bribery risks on our organization. Therefore, Vigilance division under the guidance of CVO has taken up the initiative to implemented ISO 37001 Anti-Bribery Management Systems (ABMS) and received its license for the Anti Bribery Management System from M/s BIS on 27.10.2020. It is one of the greatest achievements of our organization, as CWC became the first to have ISO 37001 certification among all the PSUs.

The implementation of ABMS had improved the organisational efficiency and effectiveness in managing risks associated with bribery. It increased the awareness of bribery's impacts on the organisation, highlights the ability to detect fraud, enhance an organisation's reputation and image by assuring legal compliance. It also demonstrated a benchmark of good practice in anti-bribery management systems and organisation's commitment to anti-bribery practices and provides confidence and trust to potential partners like our depositors, suppliers, Handling & transportation contractors etc.
