The following document has been prepared by the Functional Requirements In Buildings Sectional Committee, CED 12. Please click here to view the document.

Document Number: CED 12 (25128) WC

Title of the document: Acoustics Determination of acoustic properties in impedance tubes Part 2: Two-

microphone technique for normal sound absorption coefficient and normal surface impedance

Document Type: New Indian Standard

This document has following salient features which may require specific attention for your valuable comments:

1) This test method covers the use of an impedance tube, two microphone locations and a frequency analysis system for the determination of the sound absorption coefficient of sound absorbing materials for normal incidence sound incidence.

2) It can also be applied for the determination of the acoustical surface impedance or surface admittance of sound absorbing materials.

Please examine the document and share your comments regarding further improvement in the document.

Last date for sharing the comments is: 27 April 2024

The comments should be shared in the prescribed template through this portal only; and the comments so received shall be taken up by the Sectional Committee for necessary action.
