

DRAFT AMENDMENT TO INDIAN STANDARD IN WIDE CIRCULATION

Reference : PCD 06 (25037)

Date : 11 March 2024

TECHNICAL COMMITTEE : Bitumen, Tar and Related Products, PCD 06

To,

All concerned

Dear Madam/Sir,

The following document has been prepared by the Bitumen, Tar and Related Products Sectional Committee, PCD 06. Please [click here](#) to view the document.

Document Number : PCD 06 (25037) WC

Title of the document : Rubber modified bitumen (Rmb) - specification Amendment - 1

Document Type : Amendment to Indian Standard (IS 17079 : 2019)

This document has following salient features which may require specific attention for your valuable comments:

1) The committee deliberated that the method for the measurement of Viscosity at 150°C for CRMB is mentioned as IS 1206 P-2 which is exclusively for normal viscosity grade bitumen and Capillary viscometer is used for this purpose. If viscosity of rubber modified bitumen is tested using capillary viscometer then (i) it will clog the capillary (ii) the flow of CRMB will not be Newtonian. Accordingly, the committee decided to change the method of test as given in draft amendment.

Please examine the document and share your comments regarding further improvement in the document.

Last date for sharing the comments is : 10 May 2024

The comments should be shared in the prescribed template through this portal only; and the comments so received shall be taken up by the Sectional Committee for necessary action. For any other query, please write an email at pcd@bis.gov.in to the undersigned at Bureau of Indian Standard, Manak Bhawan, 9, Bahadur Shah Zafar Marg, New Delhi.

In case no comments are received, we would presume your approval of the documents. However, in case we receive any comments on the document, the same shall be put up to the Sectional Committee for necessary action.

Thanking You,

Yours faithfully,
