To,

**All concerned**

Dear Madam/Sir,

The following document has been prepared by the Bearing Sectional Committee, PGD 13. Please [click here](#) to view the document.

**Document Number : PGD 13 (24935) WC**

**Title of the document : Mechanical Vibration Vibration of Rotating Machinery Equipped with Active Magnetic Bearings Part 2 Evaluation of Vibration**

**Document Type : New Indian Standard**

*This document has following salient features which may require specific attention for your valuable comments:*

*1) This standard sets out general guidelines for measuring and evaluating rotating machinery equipped with active magnetic bearings (AMBs) with respect to the following two indices: — shaft vibratory displacement measured at or close to the AMBs, and — working current and voltage measured in magnetic coils or power supply amplifiers. Both indices are measured under nominal operating conditions in house and/or on site. These guidelines are presented in terms of both steady-state running values of these indices and any magnitude changes which may occur in these steady-state operations.*

Please examine the document and share your comments regarding further improvement in the document.

**Last date for sharing the comments is : 22 April 2024**

The comments should be shared in the prescribed template through this portal only; and the comments so received shall be taken up by the Sectional Committee for necessary action.
