**CODE OF PRACTICE FOR
WATER SUPPLY IN BUILDINGS**

1. SCOPE

1.1 This code deals with water supply in buildings, and covers general requirements and regulations for water supply, plumbing connected to public water supply, licensing of plumbers, design of water supply systems, principles of conveyance and distribution of water within the premises, storage, water fittings and appliances, and inspection and maintenance.

1.2 Many administrative authorities controlling water supply have their own set of bye-laws, rules and regulations for supply of water to suit local conditions. These should be strictly conformed to before operations are commenced for laying of pipelines or plumbing systems which are to be connected to public water supply.

1.3 This code does not cover aspects of water supply for fire fighting purposes.
