Draft Indian Standard

Photography — Sheets of sensitized material for the pre-press industry — Dimensions and related requirements

(First Revision of IS 12517)

ICS 37.040.20

Electroplating Chemicals and Photographic Materials
Sectional Committee, CHD 5

Last Date for Comments: 03 November 2025

NATIONAL FOREWORD

(formal clauses to be added later)

This standard was first published in 1988 by taking considerable assistance from ISO/DIS 6407 'Photography — Black and white film for graphic arts use — Sizes, quantity packaging and labelling'. The Committee responsible for formulation of this standard has decided to revise and harmonize this standard by identical adoption of the latest ISO 11312 : 2000.

This Standard applies to sheets of photographic sensitized materials for use in the pre-press industry. It specifies dimensions and package marking of sensitized materials including those for electronic scanners.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions and terminologies are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'; and
- b) Comma (,) has been used as a decimal marker, while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

The Committee has reviewed the provisions of the following International Standard referred in this adopted standard and has decided that it is acceptable for use in conjunction with this standard:

<i>International Standard</i>	<i>Title</i>
ISO 1:1975	Standard reference temperature for industrial length measurements
ISO 216 : 1975	Writing paper and certain classes of printed matter — Trimmed sizes — A and B series
ISO 554:1976	Standard atmospheres for conditioning and/or testing — Specifications

In this adopted standard, reference appears to certain International Standards where the standard atmospheric conditions to be observed are stipulated which are not applicable to tropical/subtropical countries. The applicable standard atmospheric conditions for Indian conditions are $(27 \pm 2) ^\circ\text{C}$ and (65 ± 5) percent relative humidity and shall be observed while using this standard.

In reporting the result of a test or analysis made in accordance with this standard, if the final value, observed or calculated, is to be rounded off, it shall be done in accordance with IS 2 : 2022 'Rules for rounding off numerical values (*second revision*)'.

'FOR COMPLETE TEXT OF THE DOCUMENT, KINDLY REFER ISO 11312 : 2000

Note: The technical content of the document has not been enclosed as these are identical with the corresponding ISO Standard. For obtaining the copy of the complete ISO Standard, please contact:
