Last date for Comments: 16 Dec 2022

NATIONAL FOREWORD

This standard was originally published in 2010 by adoption of ISO 14065: 2007. The first revision of this standard was published in 2016 by adopting ISO 14065 : 2013. The third revision has been undertaken to align it with the latest version of ISO 14065: 2020.

The major changes in this revision as compared to the previous edition are as follows:

a) the Scope has been expanded to include bodies performing validation, verification and agreed upon procedures in all areas of environmental information (not only greenhouse gas);
b) it has been aligned with the requirements of ISO/IEC 17029;
c) Annex D has been added for additional requirements applicable to green bonds;
d) Annex E has been added for additional requirements applicable to greenhouse gases;
e) Annex F has been added for additional requirements applicable to non-financial disclosure.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

a) Wherever the words 'International Standard' appears referring to this standard, they should be read as 'Indian Standard'.

b) Comma (,) has been used as a decimal marker, while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exit. The corresponding Indian Standards, which are to be substituted in their places, are listed below along with their degree of equivalence for editions indicated:

International Standard	*Corresponding Indian Standard*	*Degree of Equivalence*
ISO 14064-3 Greenhouse gases — Part 3: Specification with guidance for the validation and verification of greenhouse gas assertions.	IS/ISO 14064-3: 2006 Greenhouse gases: Part 3 Specification with guidance for the validation and verification of greenhouse gas assertions.	Identical under single numbering (ISO 14064: Part 3: 2006)
ISO 14066, Greenhouse gases — Competence requirements for greenhouse gas validation teams and verification teams	IS/ISO 14066 : 2011 Greenhouse gases - Competence requirements for greenhouse gas validation teams and verification teams	Identical under single numbering (ISO 14066 : 2011)
ISO/IEC 17000 Conformity assessment — Vocabulary and general principles	IS/ISO/IEC 17000 : 2020 Conformity assessment — Vocabulary and general principles (First Revision)	Identical under single numbering (IS/ISO/IEC 17000:202)
ISO/IEC 17029:2019, Conformity assessment — General principles and requirements for validation and verification bodies	IS/ISO/IEC 17029 : 2019 Conformity assessment - General Principles and Requirements for Validation and Verification Bodies	Identical under single numbering (IS/ISO/IEC 17029:201)

The technical committee responsible for the preparation of this standard has reviewed the provisions of the below mentioned ISO/IEC standards and has decided that they are acceptable for use in conjunction with this standard.

International Standard	*Title*

ISO 14030-4	Environmental performance evaluation — Green debt instruments — Part 4: Verification programme requirements.
ISO 14097	Framework including principles and requirements for assessing and reporting investments and financing activities related to climate change
