**NATIONAL FOREWORD**

This standard was originally published in 2014 by adopting ISO 14066 : 2011. The first revision has been undertaken to align it with the latest version of ISO 14066 : 2023.

This International Standard specifies competence requirements for validation teams and verification teams for the benefit of GHG programme administrators, regulators and validation and verification bodies. The standard also provides guidance on methods for evaluating the competence of GHG validation teams and verification teams. ISO 14066 is GHG programme neutral.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words 'International Standard' appears referring to this standard, they should be read as 'Indian Standard'.

b) Comma (,) has been used as a decimal marker, while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exist. The corresponding Indian Standards, which are to be substituted in their places, are listed below along with their degree of equivalence for editions indicated:

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
ISO 14065, Greenhouse gases — Requirements for greenhouse gas validation and verification bodies for use in accreditation or other forms of recognition.	IS/ISO 14065 : 2013 Greenhouse gases - Requirements for greenhouse gas validation and verification bodies for use in accreditation or other forms of recognition (First Revision)	Identical under single numbering (ISO 14065 : 2013)
ISO 14064-3, Greenhouse gases — Specification with guidance for the validation and verification of greenhouse gas assertions	IS/ISO 14064-3 : 2006 Greenhouse gases: Part 3 specification with guidance for the validation and verification of greenhouse gas assertions	Identical under single numbering (ISO 14064 : PART 3 : 2006)
