Last date for Comments: 01 July, 2024

NATIONAL FOREWORD

(Formal clauses shall be added later)

This standard specifies principles, requirements and guidelines for the verification and validation of water statements. It applies to organizational, product and project water statement verification and validation, and can also be used to provide confidence in reported water information on a local, regional or national level.

This standard is programme neutral. If a programme is applicable, requirements of that programme are additional to the requirements of this document.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- Wherever the words 'International Standard' appears referring to this standard, they should be read as 'Indian Standard'.
- Comma (,) has been used as a decimal marker, while in Indian Standards, the current practice is to use a point (.) as the decimal marker.
