DRAFT FOR COMMENTS ONLY

(Not to be reproduced without the permission of BIS or used as an Indian Standard)

Draft Indian Standard

**LIGHTNING PROTECTION SYSTEM COMPONENTS (LPSC) –
Part 1: Requirements for connection components**
(ICS 29.020; 91.120.40)

Electrical Installation
Sectional Committee, ETD 20

Last date for Comments – 27/02/2024

FOREWORD

(Formal clauses will be added later)

This draft standard which is identical with IEC 62561-1-2023 ‘Lightning protection system components (LPSC) - Part 1: Requirements for connection components’ issued by the International Electrotechnical Commission (IEC) is proposed to be adopted by the Bureau of Indian Standards on the recommendation of the Electrical Installation Sectional Committee and approval of the Electrotechnical Division Council.

The text of the IEC Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appears referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker, while in Indian Standards the current practice is to use a point (.) as the decimal marker.

The technical committee has reviewed the provisions of the following international standards referred in this adopted standard and decided that they are acceptable for use in conjunction with this standard.

<i>International Standard</i>	<i>Title</i>
IEC 60068-2-52:2017	Environmental testing – Part 2-52: Tests – Test Kb: Salt mist, cyclic (sodium chloride solution)
IEC 62561-2	Lightning protection system components (LPSC) – Part 2: Requirements for conductors and earth electrodes
ISO 6957:1988	Copper alloys – Ammonia test for stress corrosion resistance

ISO 22479:2019	Corrosion of metals and alloys – Sulfur dioxide test in a humid atmosphere (fixed gas method)
----------------	---

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test, shall be rounded off in accordance with IS 2: 2022 ‘Rules for rounding off numerical values (*Second Revision*)’. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

Scope

To prepare standards for safety and related matters in designing, erection and maintenance of electrical installations from the point of view of safety and good practice that would, amongst other things, promote compatibility between such standards and those concerning the equipment installed. The work includes electrical installations in buildings for different occupancies and outdoor sites of temporary or permanent nature and also installations in the ships.

Note — The technical content of their document has not been enclosed as there are identical with the corresponding IEC standards for details, please refer the corresponding IEC 62561-1-2023 or kindly contact:
