NATIONAL FOREWORD

This Indian Standard which is identical with IEC 60335-2-30 “Household and similar electrical appliances– Safety– Part 2-30: Particular requirements for room heaters” issued by the International Electrotechnical Commission (IEC) will be adopted by the Bureau of Indian Standards on the recommendation of the Electrical Appliances Sectional Committee.

This standard was first published in 1992 and revised in 2007. This revision has been undertaken to align with the latest version of IEC 60335-2-30:2009+AMD1:2016+AMD2:2021.

This standard covers the safety requirements of electric radiator (room heaters). This standard however does not cover the performance requirements, which are covered under a separate standard (see IS 369).

The principal changes in this edition are as follows (minor changes are not listed):

- 1) some additional instructions are introduced for heaters without a built-in thermostat, or those installed in the floor or in a bathroom (7.12 and 7.12.1);
- 2) a spillage test is introduced for appliances having a grille and that are built into the floor (15.2).

This part 2 is to be used in conjunction with IS 302-1: 2023, Safety of Household and Similar Electrical Appliances Part 1 General Requirements (Seventh Revision) [Doc: ETD 32 (22184)WC (*Under preparation*)].

NOTE 1— When “Part 1” is mentioned in this standard, it refers to IEC 60335-1.

This part 2 supplements or modifies the corresponding clauses in IS 302-1, so as to convert that publication into the Indian standard: Particular requirements for room heaters.

When a particular subclause of Part 1 is not mentioned in this part 2, that subclause applies as far as is reasonable. When this standard states “addition”, “modification” or “replacement”, the relevant text in Part 1 is to be adapted accordingly.

NOTE 2— The following numbering system is used:

- a) subclauses, tables and figures that are numbered starting from 101 are additional to those in Part 1;
- b) unless notes are in a new subclause or involve notes in Part 1, they are numbered starting from 101, including those in a replaced clause or subclause;
- c) additional annexes are lettered AA, BB, etc.

NOTE 3— The following print types are used:

- a) requirements: in roman type;
- b) test specifications: in italic type;
- c) notes: in small roman type.

The text of IEC Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain terminologies and conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker, while in Indian Standards the current practice is to use a point (.) as the decimal marker.

In this standard, reference appears to International Standards for which Indian Standards also exists. The corresponding Indian Standards, which are to be substituted, are listed below along with their degree of equivalence for the editions indicated:

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
IEC 60335-1, Household and similar electrical appliances – Safety – Part 1: General requirements	[Doc: ETD 32 (22184)WC <i>Under preparation</i>] IS 302-1: 2023, Safety of Household and Similar Electrical Appliances Part 1 General Requirements (Seventh Revision)	Identical with IEC 60335-1 2020
IEC 60335-2-80, Household and similar electrical appliances – Safety – Part 2-80: Particular requirements for fans	IS 302 (Part 2/Sec 80) : 2017, Household and similar electrical appliances - Safety: Part 2 - 80 particular requirements for fans (First Revision)	Identical with IEC IEC 60335-2-80 : 2008
ISO 2758, Paper – Determination of bursting strength	IS 1060 (Part 6/Sec 2) : 2014, Methods of sampling and test for paper and allied products: Part 6 methods of test for paper: Sec 2 determination of bursting strength of paper	Identical with ISO 2758: 2001

The technical committee has reviewed the provisions of the following international standards referred in this adopted standard and decided that they are acceptable for use in conjunction with this standard.

<i>International Standard</i>	<i>Title</i>
IEC 60335-2-5:2002	<i>Household and similar electrical appliances – Safety – Part 2-5: Particular requirements for dishwashers</i>
IEC 60335-2-43	<i>Household and similar electrical appliances – Safety – Part 2-43: Particular requirements for clothes dryers and towel rails</i>

<i>ISO 3864-1</i>	<i>Graphical symbols – Safety colours and safety signs – Part 1: Design principles for safety signs in workplaces and public areas</i>
-------------------	--

Only the English language text has been retained while adopting it in this Indian Standard, and as such, the page numbers given here are not the same as in the IEC Publication.

For the purpose of deciding whether a particular requirement of this standard is complied with the final value, observed or calculated expressing the result of a test or analysis shall be rounded off in accordance with IS 2: 2022 ‘Rules for rounding of numerical values (revised)’. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

Please send your comments to our department email, in case you missed the deadline mentioned in the National Foreword. Comments received before the upcoming Sectional Committee meeting of ETD 32 Electrical Appliances will be considered for discussion.
