BUREAU OF INDIAN STANDARDS DRAFT FOR COMMENTS ONLY

(Not to be reproduced without the permission of BIS or used as an Indian Standard)

Draft Indian Standard

Wind energy generation systems – Part 50-1: Wind measurement – Application of meteorological mast, nacelle and spinner mounted instruments

(ICS 27.180)

Wind Turbines
Last date for Comments -21/11/2023
Sectional Committee, ETD 42

FOREWORD

(Formal clauses will be added later)

This Draft Standard which is identical with IEC 61400-50-1-2022 'Wind energy generation systems – Part 50-1: Wind measurement – Application of meteorological mast, nacelle and spinner mounted instruments' issued by the International Electrotechnical Commission (IEC) is proposed to be adopted by the Bureau of Indian Standards on the recommendation of the Wind Turbines Sectional Committee and approval of the Electrotechnical Division Council.

The text of the IEC Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words 'International Standard' appears referring to this standard, they should be read as 'Indian Standard'.
- b) Comma (,) has been used as a decimal marker, while in Indian Standards the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to International Standards for which Indian Standards also exists. The corresponding Indian Standards, which are to be substituted, are listed below along with their degree of equivalence for the editions indicated:

Doc. No.: ETD 42 (23629) WC Sepetember 2023

International Standard	Corresponding Indian Standard	Degree of Equivalence
ISO 3966, Measurement of fluid	IS 14973: 2019 Measurement of	Identical with ISO 3966:
flow in closed conduits – Velocity	Fluid Flow in Closed Conduits —	2008
area method using Pitot static	Velocity Area Method Using Pitot	
tubes	Static Tube (First Revision)	

The technical committee has reviewed the provisions of the following international standards referred in this adopted standard and decided that they are acceptable for use in conjunction with this standard.

International Standard	Title
ISO 2533-1975	Standard atmosphere
ISO/IEC Guide 98- 3:2008	Uncertainty of measurement – Part 3: Guide to the expression of uncertainty in measurement (GUM:1995)

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test, shall be rounded off in accordance with IS 2: 2022 'Rules for rounding off numerical values (*Second Revision*)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

Note: The technical content of their document has not been enclosed as there are identical with the corresponding IEC standards for details, please refer the corresponding IEC 61400-50-1-2022 or kindly contact:
