TO

**IS/ISO 16039 : 2004 ROAD CONSTRUCTION AND MAINTENANCE
EQUIPMENT — SLIPFORM PAVERS — DEFINITIONS AND COMMERCIAL
SPECIFICATIONS**

ICS 01.040.91; 91.220; 93.080.10

Construction Plant and Machinery Sectional
Committee Sectional Committee, MED 18

Last date of receipt of
comment is 09 June 2024

NATIONAL ANNEX

(Adoption clause to be added later)

The amendment of this standard has been undertaken to align it with the latest amendment of ISO 16039 : 2004 ‘Road construction and maintenance equipment — Slipform pavers — Definitions and commercial specifications’.

The text of ISO standard has been approved for publication as Indian Standard without deviations. Certain terminologies and conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as a decimal marker.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS 2 : 2022 ‘Rules for rounding off numerical values (*second revision*)’. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

NOTE: The technical content of the document has not been enclosed as these are identical with the corresponding ISO standard. For details, please refer the corresponding **ISO 16039 : 2004/ Amd 1 : 2013** or kindly contact:
