Draft Indian Standard

Dentistry — Oral Care Products — Oral Rinses

ICS 97.170

Dentistry Sectional Committee, MHD 08

Last date for comments: 13 April 2024

NATIONAL FOREWORD

(Adoption clause will be added later)

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are however not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'
- Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exist. The corresponding Indian Standards which are to be substituted in their respective places are listed below along with their degree of equivalence for the editions indicated:

| <i>International Standard</i> | <i>Corresponding Indian Standard</i> | <i>Degree of Equivalence</i> |
|---|---|------------------------------|
| ISO 1942, Dentistry — Vocabulary | IS 17895 : 2023/ISO 1942 : 2020, Dentistry Vocabulary | Identical |
| ISO 3696, Water for analytical laboratory use — Specification and test methods | IS 1070 : 2023, Reagent grade water - Specification (<i>Fourth Revision</i>) | Modified |
| ISO 8601, Data elements and Interchange formats — Information interchange — Representation of dates and times | IS/ISO 8601-1 : 2019, Date and Time Representations For Information Interchange Part 1: Basic Rules | Not Equivalent |

IS/ISO 8601-2 : 2019, Date and
Time Representations For
Information Interchange Part 2:
Extensions

The technical committee has reviewed the provisions of the following International Standards referred in this adopted standard and has decided that they are acceptable for use in conjunction with this standard:

| <i>International Standard</i> | <i>Title</i> |
|-------------------------------|--|
| ISO 28888 | Dentistry — Screening method for erosion potential of oral rinses on dental hard tissues |
| INCI | International Nomenclature for Cosmetic Ingredients |

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test shall be rounded off in accordance with IS 2: 2022 ‘Rules for rounding off numerical values (*second revision*)’.

This standard also makes a reference to the BIS Certification Marking of the product. Details of which is given in National Annex A.

NATIONAL ANNEX A
(National Foreword)

A-1 BIS CERTIFICATION MARKING

The product(s) conforming to the requirements of this standard may be certified as per the conformity assessment schemes under the provisions of the *Bureau of Indian Standards Act, 2016* and the Rules and Regulations framed thereunder, and the product(s) may be marked with the Standard Mark.

Scope

This International Standard specifies physical and chemical requirements and test methods for oral rinses. It also specifies the accompanying information such as the manufacturer's instructions for use, marking, and/or labelling requirements.

This International Standard is not applicable to other delivery systems (e.g. mouthsprays, foams, powders). It is not intended to describe regulatory aspects, e.g. methods of prescription.

This International Standard is not applicable to oral rinses available by prescription only.

The technical content of the document has not been enclosed as it is identical with the corresponding ISO standard. For details, please refer to ISO 16408:2015 or kindly contact:
