NATIONAL FOREWORD

(Formal clauses will be added later).

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'.
- Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standard for which Indian Standard also exist. The corresponding Indian Standard, which is to be substituted in their respective places, is listed below along with their degree of equivalence for the editions indicated:

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
ISO 291, Plastics — Standard atmospheres for conditioning and testing	IS 196 : 1966 — Atmospheric conditions for testing (Revised)	Not Equivalent
ISO 4582, Plastics — Determination of changes in colour and variations in properties after exposure to daylight under glass, natural	IS 13360 (Part 8/Sec 13) : 2021/ ISO 4582 : 2017 Plastics — Methods of testing : Part 8 Permanence/Chemical properties, Section 13 Determination of changes in colour and variations in	Identical

weathering or laboratory light sources	properties after exposure to daylight under glass natural weathering or laboratory light sources (<i>second revision</i>)	
ISO 4892-1, Plastics — Methods of exposure to laboratory light sources — Part 1: General guidance	IS 17863 (Part 1) : 2022 / ISO 4892-1: 2016 Plastics — Methods of exposure to laboratory light sources : Part 1 General guidance	Identical
ISO 4892-2, Plastics — Methods of exposure to laboratory light sources — Part 2: Xenon-arc lamps	IS 17863 (Part 2) : 2022 / ISO 4892-2:2013 Plastics — Methods of exposure to laboratory light sources: Part 2 Xenon-arc lamps	Identical
ISO 4892-3, Plastics — Methods of exposure to laboratory light sources — Part 3: Fluorescent UV lamps	IS 17863 (Part 3) : 2022 / ISO 4892-3:2016 Plastics — Methods of exposure to laboratory light sources : Part 3 Fluorescent UV Lamps	Identical

For tropical countries like India, the standard temperature and the relative humidity shall be taken as 27 ± 2 °C and 65 ± 5 percent respectively.

In reporting the result of a test or analysis made in accordance with this standard, if the final value, observed or calculated, is to be rounded off, it shall be done in accordance with IS 2 : 2022 ‘Rules for rounding off numerical values (*second revision*)’.

NOTE — The technical content of this document has not been enclosed as this is identical with the corresponding ISO Standard. For details, please refer to ISO 6974-4: 2012 or kindly contact:
