Draft Indian Standard

Hand-held non-electric power tools Safety requirements

Part 7 Grinders

ICS 25.140.10

Pneumatic and Hydraulic Tools Sectional	Last date for receipt of comment is: 29
Committee, PGD 08	November 2025

NATIONAL FOREWORD

This Indian Standard which is identical with ISO 11148-7: 2012 'Hand-held non-electric power tools Safety Requirements Part 7: Grinders issued by the International Organization for Standardization (ISO) will be adopted by the Bureau of Indian Standards on the recommendation of the Pneumatic and Hydraulic Tools Sectional Committee and approval of the Production and General Engineering Division Council.

This standard has been published in several parts, other parts in this series are:

Part 1: Assembly power tools for non-threaded mechanical fasteners

Part 2: Cutting-off and crimping power tools

Part 3: Drills and tappers

Part 4: Non-rotary percussive power tools

Part 5: Rotary percussive drills

Part 6: Assembly power tools for threaded fasteners

Part 8: Sanders and polishers

Part 9: Die grinders

Part 10: Compression power tools

Part 11: Nibblers and shears

Part 12: Circular, oscillating and reciprocating saws

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

a) Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'.

b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exist. The corresponding Indian Standards, which are to be substituted in their respective places, are listed below along with their degree of equivalence for the editions indicated:

International Standard	Corresponding Indian Standard	Degree of Equivalence
ISO 5391 Pneumatic tools and machines — Vocabulary	IS 12849:2015/ISO 5391:2003 Pneumatic tools and machines - Vocabulary (First Revision)	Identical
machinery — General principles	IS 16819:2018/ISO 12100:2010 Safety of machinery - General principles for design - Risk assessment and risk reduction	Identical
•	non - Electric power tools - Noise measurement code - Engineering	Identical

The technical committee has reviewed the provisions of the following International Standard referred in this adopted standard and has decided that it is acceptable for use in conjunction with this standard:

International Standard	Title
ISO 3857-3	Compressors, pneumatic tools and machines — Vocabulary —
	Part 3: Pneumatic tools and machines
ISO 13732-1	Ergonomics of the thermal environment — Methods for the
	assessment of human responses to contact with surfaces —
	Part 1: Hot surfaces
ISO 13732-3	Ergonomics of the thermal environment — Methods for the
	assessment of human responses to contact with surfaces —
	Part 3: Cold surfaces
ISO 17066	Hydraulic tools — Vocabulary
	Mechanical vibration — Hand-held and hand-guided
ISO 20643	machinery — Principles for evaluation of vibration emission
ISO 28927-1:2009	Hand-held portable power tools — Test methods for
	evaluation of vibration emission —Part 1: Angle and vertical
	grinders

ISO 28927-4	Hand-held portable power tools — Test method for evaluation
	of vibration emission — Part 4:Straight grinders
EN 10111	Continuously hot rolled low carbon steel sheet and strip for
	cold forming — Technical delivery conditions
EN 10130	Cold rolled low carbon steel flat products for cold forming —
	Technical delivery conditions
EN 12418	Masonry and stone cutting-off machines for job site — Safety
EN 12096	Mechanical vibration — Declaration and verification of
	vibration emission values

For the purpose of deciding whether a particular requirement of this standard is complied with the final value, observed or calculated, expressing the result of a test or analysis shall be rounded off in accordance with IS 2: 2022 'Rules for rounding off numerical values (second revision)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

NOTE: The technical content of draft standard is not available on website. For details please refer to ISO 11148-7: 2012 or contact:
