NATIONAL FOREWORD

This draft Indian Standard which is identical with ISO 21384-4 : 2020 'Unmanned aircraft systems — Part 4 Vocabulary' issued by International Organization for Standardization (ISO), will be adopted by the Bureau of Indian Standards on the recommendations of Unmanned Aerial Vehicles Sectional Committee and approval of the Transport Engineering Division Council.

The text of ISO standard is proposed for publication as an Indian Standard without deviations. Certain terminologies and conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'.
- Comma (,) has been used as a decimal marker, while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. The Bureau of Indian Standards shall not be held responsible for identifying any or all such patent rights.

SCOPE

This document defines terms and definitions relating to unmanned aircraft systems that are widely used in science and technology.
