Inland Harbour Crafts and Fishing Vessels Sectional Committee, TED 18

NATIONAL FOREWORD

This draft Indian Standard (First Revision) which is identical with ISO 8666:2020 ‘Small craft — Principal data’ issued by the International Organization for Standardization (ISO), will be adopted by the Bureau of Indian Standards on recommendation of the Inland Harbour Crafts and Fishing Vessels Sectional Committee and approval of the Transport Engineering Divisional Council.

This standard was first published in 2020 which was identical adoption of ISO 8666:2016. This first revision of the standard has been undertaken to harmonize it with ISO 8666:2020. The changes compared to the previous edition are as follows:

- a) Addition of Clause 2, Normative references, and the renumbering of the remaining clauses; all cross-references have been accordingly updated;
- b) The ‘allowance for the maximum mass of optional equipment and fittings not included in the manufacturer’s basic outfit’ has been moved from 6.6 (Maximum load, former 5.6) to 7.8 (Maximum load condition, former 6.8).
- c) Hindi title of the standard has been modified.

The text of ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain conventions and terminologies are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker, while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. The Bureau of Indian Standard shall not be held responsible for identifying any or all such patent rights.

SCOPE

This document establishes definitions of main dimensions and related data and of mass specifications and loading conditions. It applies to small craft having a length of the hull (L_H) of up to 24 m.
