Indian Standard

SPECIFICATION FOR
INSULATING VARNISHES CONTAINING
SOLVENTS

PART 3 SPECIFICATIONS FOR INDIVIDUAL MATERIALS

Section 4 Baking Varinishes with Temperature Index 120

0. FOREWORD

0.1 This Indian Standard (Part 3/Sec 4) was adopted by the Indian Standards Institution on 24 March 1983, after the draft finalized by the Solid Electrical Insulating Materials Sectional Committee had been approved by the Electrotechnical Division Council.

0.2 This standard deals with insulating varnishes containing solvents. It consists of the following three parts:

- Part 1 Definitions and general requirements,
- Part 2 Methods of tests, and
- Part 3 Specifications for individual materials.

1. SCOPE

1.1 This standard (Part 3/Sec 4) covers the requirements for both impregnating and finishing insulating varnishes containing solvents, curing of which requires the application of heat and which are of temperature index 120.

1.2 Impregnating varnishes are classified in two types, namely:

- a) flexible, and
- b) hard.
