

SYNOPSIS

Doc: MHD 08 (13272) IS/ISO 9917-2: 2017-Dentistry- water-based cement-Part 2: Resin-Modified cements(First Revision)

a) Scope:

This standard specifies requirements and test methods for water-based dental cements in which setting is achieved by a combination of an acid-base reaction and polymerization. The materials are intended for luting, base or lining, restoration and tooth core build up purposes

b) Salient features of content:

This standard has been prepared in order to present the requirements and test methods for cements in which setting is achieved by a combination of an acid-base reaction and polymerization. The polymerization component of the reaction may be activated by mixing different components or through application of energy from an external source. As far as possible, test methods employed within this document have been harmonized with those used in ISO 4049 and ISO 9917-1.

c) Type/grades/classes, if any covered in the standard: Nil.
