Indian Standard
**GUIDE FOR THE
DETERMINATION OF THE AROMATIC
HYDROCARBON CONTENT OF NEW
INSULATING OILS**
PART 1 ADSORPTION CHROMATOGRAPHIC METHOD

1. SCOPE

1.1 This standard (Part 1) describes the method of determination of the aromatic hydrocarbon content of new insulating oils by adsorption chromatographic method.

1.2 Adsorption chromatographic test method describes the measurement of the percentage by mass of polar compounds and compounds containing at least one aromatic ring per molecule present in low molecular mass insulating oils.
