Indian Standard

**SPECIFICATION FOR
GASSING OF INSULATING LIQUIDS UNDER
ELECTRIC STRESS AND IONIZATION**

**PART 2 METHOD OF DETERMINATION OF GASSING
RATE UNDER NITROGEN ATMOSPHERE**

1. SCOPE

1.1 This standard (Part 2) covers the method to determine whether insulating liquids are gas evolving or gas absorbing under the test conditions when subjected to electric stress of sufficient intensity to cause an electric discharge through a gas phase in which a gas-oil interface is located under a nitrogen atmosphere.
