

SYNOPSIS

Doc: MHD 08 (14112) IS/ISO 11953:2010 Dentistry — Implants — Clinical performance of hand torque instruments

a) Scope:

This Standard describes a classification system for hand-held torque wrenches intended for clinical use. It specifies their performance requirements in terms of accuracy and reproducibility and resistance to reprocessing.

Test methods are described, and marking and labelling requirements are specified.

This Standard does not include electronically controlled devices.

b) Salient features of content:

The standard describes terms and definitions, requirements, test methods and Marking, labelling and manufacturer's instructions for use

c) Type/grades/classes, if any covered in the standard: Nil
