Indian Standard

**PLANNING AND DESIGN OF DRAINAGE IN
IRRIGATION PROJECTS — GUIDELINES**

1 SCOPE

This standard lays down the guidelines for planning and design of drainage system in irrigation projects including the guidelines for dealing with the problem of drainage in the command areas of irrigation projects

FOREWORD

This Indian Standard was adopted by the Bureau of Indian Standards, after the draft finalized by the Water Resources Planning, Management and Evaluation Sectional Committee had been approved by the Water Resources Division Council.

There is no ISO standard on the subject. This standard has been prepared based on the practices prevalent in the field in India.

The composition of the Committee responsible for formulation of this standard is given in Annex A.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, should be rounded off in accordance with IS 2:1960 'Rules for rounding off numerical values (*revised*)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.
