

*Indian Standard*  
CODES FOR THE REPRESENTATION OF  
CURRENCIES AND FUNDS  
(*First Revision*)

**Codes for the representation  
of currencies and funds**

## **1 Scope**

This International Standard specifies the structure for a three-letter alphabetic code and an equivalent three-digit numeric code for the representation of currencies and funds. For those currencies having minor units, it also shows the decimal relationship between such units and the currency itself.

This International Standard also establishes procedures for a Maintenance Agency, and specifies the method of application for codes.

This International Standard is intended for use in any application of trade, commerce and banking, where currencies and, where appropriate, funds are required to be described. It is designed to be equally suitable for manual users and for those employing automated systems.

## **2 Normative references**

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 3166-1:2006, *Codes for the representation of names of countries and their subdivisions — Part 1: Country codes*
