

SYNOPSIS OF IS 15474 (Part 3/Sec 14): 2019 of LITD

<p>Number and Title of the Indian Standard:</p>	<p>IS 15474 (Part 3/Sec 14): 2019 /IEC 60300-3-14 : 2004 Dependability Management Part 3 Application guide Section 14 Maintenance and maintenance support [[Superseding 1) IS 9692 (Part 8/Sec 1): 1988 ; 2) IS 9692 (Part 8/Sec 2): 1988 ; 3) IS 9692 (Part 8/Sec 3): 1988 ; and 4) IS 9692 (Part 8/Sec 4): 1988]</p>
<p>a) Scope:</p>	<p>This part of IS 15474/ IEC 60300 describes a framework for maintenance and maintenance support and the various minimal common practices that should be undertaken. The purpose of this standard is to outline, in a generic manner, management, processes and techniques related to maintenance and maintenance support that are necessary to achieve adequate dependability to meet the operational needs of the customer.</p> <p>NOTE 1 Maintenance and maintenance support are a major element of dependability as described in IEC 60300-1 and IEC 60300-2.</p> <p>In some cases, regulatory and other mandatory requirements need to be considered. Maintenance and maintenance support requirements and obligations may therefore need to be specified in a contract, which cites this standard.</p> <p>This standard is intended for use by a wide range of suppliers, maintenance support organizations and users and can be applied to all items.</p> <p>This standard is applicable to items, which include all types of products, equipment and systems (hardware and associated software). Most of these require a certain level of maintenance to ensure that their required functionality, dependability, capability, economic, safety and regulatory requirements are achieved.</p> <p>NOTE 2 For consistency, this standard will use the term “item” as defined in 3.1.5, except where the context requires otherwise.</p>
<p>b) Salient features of content:</p>	<p>NA</p>
<p>c) Types/grades/classes, if any covered in the standard:</p>	<p>NA</p>
<p>d) Disclaimer (to be automatically provided by the program/software)</p>	<p>NA</p>
