SYNOPSIS

Number and Title of the Indian Standard	Doc: CHD 19 (14157)F IS _____ (Part 2) : 2019/ISO 22568-4 : 2019 Perforation Resistant Inserts for Protection of Feet – Specification Part 2 Non-Metallic Perforation Resistant Inserts
a) Scope:	This document specifies requirements and test methods for the non-metallic inserts with resistance against mechanical perforation, intended to function as components of PPE footwear (e.g. as described by ISO 20345, ISO 20346 and ISO 20347).
b) Salient features of content:	ISO 20345, ISO 20346 and ISO 20347 are related to safety, protective and occupational footwear which define the performance and required properties of the footwear. On introducing these standards all national standards relating to perforation resistant inserts were withdrawn leaving the manufacturers of these items with no means of demonstrating the performance of their products. This document has been prepared to allow manufacturers to demonstrate the type of the perforation resistant inserts before being inserted into the footwear. Non-metallic perforation resistant inserts and materials complying with the requirements of this document are suitable components of “PPE footwear”.
c) Types/grades/classes, if any covered in the standard:
