SYNOPSIS

FAD 28 (14802) Infant Formula and Adult Nutritional Determination of Total Iodine Inductively Coupled Plasma Mass Spectrometry ICP-MS

a) Scope:

This International Standard specifies a method for the quantitative determination of total iodine in infant formula and adult nutritional formula. The method is applicable to the measurement of total iodine in infant formula and adult nutritional formula from 0.5 µg/100g to 1500 µg/100g reconstituted final product and for ready-to-feed products from 2.5 µg/100 g to 1000 µg/100 g using ICP-MS.

b) Salient features of content: The Standard includes Scope, Principle, Reagents and materials, Apparatus, Procedure, Calculation and Precision data.

c) Types/grades/classes, if any covered in the standard: -NA-

d) Disclaimer (to be automatically provided by the programme/software):
