## *Indian Standard*

# **GUIDE FOR MARKING OF INSULATED CONDUCTORS**

### **1. SCOPE**

**1.1** This standard applies to the marking of insulated conductors used in industrial installations and the equipment which forms part of them, except insulated conductors constituting the terminals of electrical apparatus ( for example, rotating machines or transformers).

**1.2** It applies only to other installations and equipment (for example, telecommunication circuits or circuits including telecommunication equipment) when references is made to them.
