Indian Standard

METHOD OF TEST FOR DETERMINING DELETERIOUS SUBSTANCES IN FIBROUS INSULATING MATERIALS

1. SCOPE

1.1 This standard describes reference methods of test for determining deleterious substances or groups of substances in the following fibrous electrical insulating materials:

- a) cotton,
- b) acetylated cotton,
- c) wool,
- d) silk,
- e) jute,
- f) flax,
- g) regenerated cellulose,
- h) cellulose acetate,
- j) synthetic polymers,
- k) paper
- m) asbestos, and
- n) glass.

1.2 This standard does not apply to materials which have been given a finishing treatment, such as coating, waxing or polishing.
