Indian Standard
CODE OF PRACTICE FOR
PLASTICS PIPE WORK FOR POTABLE
WATER SUPPLIES

PART 1 CHOICE OF MATERIALS AND GENERAL
RECOMMENDATIONS

1. SCOPE

1.1 This code (Part I) deals with the selection of plastic pipe systems for cold water services up to 37°C and general recommendations applicable to all types of plastic pipe systems.

1.2 The code is limited to plastic pipes extruded from thermoplastic materials. In this code wherever the term 'polyethylene' appears singly, it refers to both low density and high density polyethylene pipes.
