Indian Standard

**CODE OF PRACTICE FOR
LIMB CONCRETE LINING FOR CANALS**

1. SCOPE

1.1 This standard covers lining of canals using kankar-line concrete and any other type of cheap lining where kankar is available.

1.2 The use of this type of lining shall be restricted to small medium size irrigation channels with capacities up to 200 cumecs and in which the velocity of water does not exceed 2 m/s.
