SYNOPSIS

Doc : MHD 09 (11649) IS 8088 : 2018 TRICYCLE, HAND PROPELLED — SPECIFICATION (*First Revision*)

a) Scope:

This Indian Standard defines the specification for Hand Propelled Tricycle, a Rehabilitation Equipment.

b) Salient features of content:

Hand propelled tricycle is used by invalid adults as well as children as a rehabilitation equipment. The design of the chair is not restrictive in nature. The tricycle can be fabricated using locally available raw materials of variable quality provided material used is equivalent in performance as inscribed in the Indian Standard. Improvements in design can be made to suit the comfort of user within the specifications of this Indian Standard. This Indian Standards also ensure interchangeability of replaceable components.

c) Type/grades/classes, if any covered in the standard: As specified in the Indian Standard
