Draft Indian Standard

CHARACTERISTICS OF LINE POST INSULATORS

Last date of receipt of comments is **12 November 2021**

Electrical Insulators and Accessories Sectional Committee, ETD 06

NATIONAL FOREWORD

(Formal clauses to be added later)

This draft Indian Standard is identical with IEC 60720:1981 'Characteristics Of Line Post Insulators' issued by International Electrotechnical Commission (IEC).

The text of IEC Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain terminologies and conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words 'International Standard' appear referring to this standard, they should be read as 'Indian Standard'.
- b) Comma (,) has been used as a decimal marker, while in Indian Standards the current practice is to use a point (.) as the decimal marker.

Only the English language text has been retained while adopting it in this Indian Standard, and as such, the page numbers given here are not the same as in the IEC Publication.

For the purpose of deciding whether a particular requirement of this standard is complied with the final value, observed or calculated expressing the result of a test or analysis shall be rounded off in accordance with IS 2 : 1960 'Rules for rounding of numerical values (*revised*)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

Note: The technical content of the document is not available on website. For details, please refer the corresponding **IEC 60720:1981** or kindly contact:
