Draft Indian Standard

**Passenger Lifts and Service Lifts — Guide Rails for Lift Cars and Counterweights —
T-Type**

Lifts, Escalators and Moving Walks Sectional Committee, ETD 25

This draft Indian Standard which is identical with ISO 7465:2007 ‘Passenger Lifts And Service Lifts — Guide Rails For Lift Cars And Counterweights — T-Type’ issued by the International Organization for Standardization (ISO) will be adopted by the Bureau of Indian Standards on the recommendation of the Lifts, Escalators and Moving Walks Sectional Committee and approval of the Electrotechnical Division Council.

The text of the ISO Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain terminology and conventions are however not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker while in Indian Standards, the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exist. The corresponding Indian Standards, which are to be substituted in their places, are listed below along with their degree of equivalence for the editions indicated:

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
ISO 1302 Geometrical Product Specifications (GPS) — Indication Of Surface Texture In Technical Product Documentation	IS 10719 : 2015 Geometrical product specifications (GPS) — Indication of surface texture in technical product documentation (<i>first revision</i>)	Identical with ISO 1302 : 2002

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test, shall be rounded off in accordance with IS 2 : 1960 ‘Rules for rounding off numerical values (*revised*)’. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

Note: The technical content of the documents is not available on website. For details, please refer the corresponding ISO 7465:2007 or kindly contact:
