BUREAU OF INDIAN STANDARDS
DRAFT FOR COMMENTS ONLY

(Not to be reproduced without the permission of BIS or used as a **STANDARD**)*Draft Indian Standard***Utility-Interconnected Photovoltaic Inverters – Test Procedure for Under Voltage Ride-Through Measurements (*First Revision*)****Last date of receipt of comments: 25 October 2021**

Solar Photovoltaic Energy Systems Sectional Committee, ETD 28

NATIONAL FOREWORD

This draft Indian Standard which is identical with IEC 62910: 2020 “Utility-Interconnected Photovoltaic Inverters – Test Procedure for Under Voltage Ride-Through Measurements” issued by the International Electrotechnical Commission (IEC) will be adopted by the Bureau of Indian Standards on the recommendation of the Solar Photovoltaic Energy Systems Sectional Committee and approval of the Electrotechnical Division Council.

This standard was first published in 2015. This first revision has been undertaken to make pace with the latest developments that have taken place at international level and to align with the latest version of IEC 62910: 2020.

The text of IEC Standard has been approved as suitable for publication as an Indian Standard without deviations. Certain terminologies and conventions are, however, not identical to those used in Indian Standards. Attention is particularly drawn to the following:

- a) Wherever the words ‘International Standard’ appear referring to this standard, they should be read as ‘Indian Standard’.
- b) Comma (,) has been used as a decimal marker, while in Indian Standards the current practice is to use a point (.) as the decimal marker.

In this adopted standard, reference appears to certain International Standards for which Indian Standards also exist. The corresponding Indian Standards, which are to be substituted in their respective places, are listed below along with their degree of equivalence for the editions indicated:

<i>International Standard</i>	<i>Corresponding Indian Standard</i>	<i>Degree of Equivalence</i>
IEC TS 61836 - Solar photovoltaic energy systems – Terms, definitions and symbols	IS 12834: 2013 - Solar Photovoltaic Energy Systems — Terms, Definitions and Symbols (<i>First Revision</i>)	Identical With - IEC/TS 61836: 2007

Only the English language text has been retained while adopting it in this Indian Standard, and as such, the page numbers given here are not the same as in the IEC Publication.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated expressing the result of a test, shall be rounded off in accordance with IS 2: 1960 'Rules for rounding off numerical values (revised)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

Note: The technical content of the document is not available on website. For details, please refer the corresponding IEC 62910: 2020 or kindly contact:
